TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript, C, Dart, HTML/CSS

Tools + Technologies: React Native, React.js, Docker, MongoDB, Git, NoSQL, Linux

EDUCATION

University of Washington - Seattle, WA

BS, Computer Science

Expected Graduation: 2024

3.5 GPA

WORK EXPERIENCE

Undergraduate Researcher - Makeability Lab - University of Washington

October 2021 – Present

- Currently helping with growing Project Sidewalk to 3+ new cities.
- Help handle and process 1000+ new sidewalk validations weekly.
- Use JavaScript, HTML, and CSS to create new features.

Software Engineering Intern - e24 Technologies

July 2020 – October 2020

- Used Python and the NLTK toolkit to help optimize speed of phone transcription software by 10%.

Coding Instructor - Young Explorers School

July 2017 – September 2017

- Taught coding to 40+ elementary/middle school kids.

PROJECTS

Spogo

Founder - <https://spogo.us/>

- Spogo helps 99% of athletes at any age and level market and monetize their name, image, and likeness.
- Deployed a full React Web App with Firebase and Node.js backend with over 20 active users.
- Published React Native app to TestFlight with over 15 downloads.
- Utilized Mailchimp and acquired 30+ waitlist sign ups.
- Placed in the top 10% in Y Combinator's winter 2022 batch.

Baseball Stat Backend

- Used Python, MLB Stats API, and MongoDB to organize, categorize, and preprocess data efficiently across 33 database documents.
- Employed different data structures and algorithms to iterate and fetch core baseball statistics for all 30 teams.

Signal App Clone

- Developed Signal Clone with Firebase backend and Google Authentication using React Native.

Netflix Website Clone

- Coded a Netflix Front-end UI Web App with React.
